Experience

Software Developer - Freelance

Mar 2025 – May 2025

- Developed a podcast streaming application allowing users to browse, discover, and listen to podcast content through a clean, user-friendly interface.
- Designed and built a responsive landing page for an individual vendor at a local farmers' market to promote products and improve online visibility.
- Developed a real estate web platform that fetches and displays dynamic property data, enabling users to browse listings and view property details efficiently.

Software Developer – Cliqpulse

May 2025 – Dec 2025

Reference – Barry Walker [barrywalker@cliqpulse.com]

- Contributed to the development of a business management web application using Next.js, serving as the primary platform for the mobile apps.
- Developed and maintained **two mobile companion applications** using **React Native** and **Expo**, supporting field operations and business management.
- Implemented secure **authentication and login flows** across both applications.
- Built core application features including:
 - Summary dashboards and operational reporting
 - CRM, finance, and stock management modules
 - Service management workflows (job cards, boot stock, and service callouts)
- Implemented job card PDF generation with automated email delivery to clients.
- Integrated push notifications **using Firebase Cloud Messaging (FCM)** to support real-time operational updates.
- Contributed to an **advanced logistics-focused mobile application**, adding:
 - QR code scanning for stock and asset tracking
 - Enhanced inventory movement and logistics workflows
 - Improved data accuracy and traceability across service operations

Projects

ClqServe – React Native, Expo, Supabase, Firebase, GitHub

Aug 2025

- Developed a **mobile companion application** to support field technicians and business operations.
- Implemented **authentication and secure login flows**.
- Built service management features including **job cards**, **boot stock management**, and **service callout** workflows.
- Implemented job card **PDF generation** with automated email delivery to clients.
- Integrated push notifications using **Firebase Cloud Messaging (FCM)**.

ClqPulse – React Native, Expo, Supabase, Github

June 2025

- Developed an **advanced logistics-focused** mobile application for business and field operations.
- Built a **summary dashboard** providing operational insights.
- Implemented **CRM**, **finance**, and **stock management** modules.
- Developed stock taking and stock transfer functionality.
- Integrated **QR code scanning** for asset and inventory tracking.
- Enhanced logistics workflows to improve data accuracy and traceability.

Northside Living - React, Tailwind, Netlify, Git

Jan - Present

- Developed a **responsive web application** for browsing and viewing property listings.
- Integrated a **REST API** to fetch and display dynamic property data.
- Built the frontend using **React** and **Tailwind CSS**, focusing on performance and responsive design.

Podify Podcast - React, Netlify, Git

Jan 2025 – Feb 2025

- Developed a **responsive podcast application** enabling users to browse, stream, and play podcast episodes.
- Integrated a **REST API** to fetch, display, and play audio content.
- Implemented the frontend using **React** with a focus on usability and seamless playback.

Swipen' Snack- React Native, NativeWind, Expo

Dec 2025 – Present

- Designed and developed a **mobile application** aimed at making meal decisions engaging and convenient.
- Implemented **Tinder-style card swiping** interactions for intuitive user experience.
- Built the frontend using **React Native** and **NativeWind**, with **Supabase** powering backend services.

Technical Skills

Languages:

HTML, CSS, JavaScript, Typescript

Frameworks / Libraries:

React, React Native, Next.js, NativeWind, Tailwind CSS

Backend/Database:

Supabase (Auth, RLS, Edge Functions, Realtime), Firebase Cloud Messaging (FCM), REST APIs, Webhooks

Developer Tools:

Git, Netlify, VS Code, Figma, Android Studio, Expo

Other / Concepts:

Mobile app development (iOS & Android), Responsive Web Design, PDF Generation, QR Code Integration, Push Notifications, Async Storage
